FIDDLE AND FIGHT A Memoir of a Life in Music

by Russell Brodine, with Virginia Brodine

Here is the story centered on Russell Brodine's life in music, from high school in Seattle, to studies at the Curtis Institute of Music in Philadelphia, through many years in the St. Louis Symphony Orchestra.

While he fiddled at his double bass, he joined with the other musicians to fight for better pay and working conditions, for equality for women and for inclusion of musicians of color in the symphonic ranks.

When he was hired in the symphony orchestra, pay was less than \$2,000 a year. They needed to fight!

"Working for improved conditions and pay is

working for better music. The quality of musical performance cannot be separated from union activity to insure a stable orchestra. Bass players are often activists for collective betterment of the orchestra. We are not frustrated soloists and sometimes refer to ourselves as gang players. This makes for cooperation and a recognition that the welfare of one depends on the welfare of all."

Fiddle and Fight includes surviving the Depression, shipyard work during World War II, other music jobs, family life and a remarkable living alliance with an African-American couple, Walter and Essie Johnson. It is a story of principled struggle against oppression and racism, well-seasoned with warmth and humor. -0729-0 PRE-PUBLICATION-PRICE \$7.50 to June 15th.

Marx - Engels Collected Works

VOLUME 48:-0548-4 \$34.95 671 pp. JUNE 2001

At last! Engels' Letters, Jan. 1887-July 1890. In addition to letters to Marx's family, to friends and to publishers, Engels is focused on working class developments in France, Germany, Britain and the USA. He documents the struggle in Germany against the Anti-Socialist Law, and notes the increasing S-D success in Reichstag elections. He fears rivalry between European powers will bring war, which would weaken the young socialist movement. He urges French socialists to organize a proper daily paper, to be less fractious in their dealings with the international movement and to make more effort to communicate with other parties.

In England he castigates the old-style trade unions and warmly welcomes the development of the new unions, in which Eleanor Marx played a major role.

VOLUME 49:-0549-2 \$24.95 OCT. 2001

Engels' letters, Aug. 1890-Sept. 1892.

More than half of these letters appear in English for the first time. They reflect the problems in the consolidation of the socialist parties and the formation of the 2nd International.

Engels continued to devote much time to the preparation of new editions and translations of his own and Marx's works. A number of letters elucidate key Marxist propositions, and defend them against simplistic interpretations and distortions. They present the essence of the Marxist method of analyzing the historical process. Questions of how to structure and build the working-class party, of democracy in the party, and opposition to sectarian or dogmatic views loom large. We follow Engels' taking an active part in consolidating the labor and socialist movements in Europe and the USA, and promoting international socialist ties.

PEOPLE BEFORE PROFITS

by Victor Perlo

A selection from the rich legacy of the late Marxist economist taken from his columns in the "People's Weekly World," 1960s thru the '90s. Readers will be somewhat amazed at how accurate and timely Perlo's approach and insight remains, how useful to the present. Through the administrations of 8 U.S. Presidents, Perlo exposed the budget scams that victimize working families; how the economic numbers are manipulated to lie, or tell only part of the truth.

Topics include jobs, wages, profits, taxes, racism, housing, social security, the federal budgets, and more. A valuable resource and handbook for teachers, students, workers, trade unionists and social activists. 0730-4 Pre-pub price to Aug. 15, '01 \$7.00.

RED ROOTS, GREEN SHOOTS

by Virginia Warner Brodine

A former editor of "Environment" magazine, and the first chair of the Commission on Environment of the CPUSA, the late author popularized the slogan, "People and Nature Before Profits." Here is a compilation of her major essays, written while she pioneered in working out the common cause of labor and "the greens" against corporate greed and to preserve our planet earth and the life it nurtures.

Topics include: Ideology and Global Ecology; Left Environmentalists; Rediscovering the Dialectics of Nature; Working Class Globalism; The Need for a Working Class Environmentalism; Dioxin is Forever, and other topics.

0731-2 Pre-pub price to Aug. 15th, '01, \$6.00

VOLUME 48 continued from page 1

Many letters concern the two 1889 Int'l Paris Congresses organized by the Workers Party of France and the Possibilists. Engels has trenchant comments on the competing strands within the French and international movements. Building on the success of the 1889 conferences, an international celebration of May Day was organized in 1890. These events were the beginnings of the Second International.

Other letters are taken up with his work editing Marx's writings, especially CAPITAL v. 2. He also corresponds with U.S. publishers about his own work, especially the U.S. edition of *The Condition of the Working Class in Britain*.

He comments on Bismarck's relationship with three generations of German emperors—both William I and Frederick III died in 1888, to be succeeded by William II, of whom Engels had a very low opinion. He is critical of both German and French nationalism, and particularly of the Boulangist current in the French working class movement, which he sees as part of the recurring French problem of Bonapartism.

The letters also show the personal side of Engels. There are visits from Eleanor Marx, Schorlemmer and many others, and his attention to holidays and celebrations. Although Engels was a formidable political analyst and opponent, he could also be a very warm friend.

NEWS FROM NOWHERE

by William Morris.

0728-2 \$7.95 Now Ready. 187 pp. \$7.95

The longest of the futuristic tales by the noted 19th Century Author, designer, and architect. "News" was written in part as a reply to Edward Bellamy's *Looking Backward*, which Morris thought did not go far enough in replacing the evils of capitalism. Here is an imagined journey in an England of social ownership—more humane and productive, with superior human relationships. It is also a celebration of humanity's link with Nature, once society is free of exploitation and greed.

HEROIC STRUGGLE: BITTER DEFEAT

- Factors Contributing to the Dismantling of the Socialist State in the USSR

by Bahman Azad 0726-6. 187 pp. \$8.50

Early reviews have hailed this book as "one of the best attempts so far" to analyze the errors in theory and practice, along with imperialist pressures, that dismantled the first socialist union of states.

Azad employs a consistent scientific methodology as a framework for his discussion, one that is helpful to the average reader.

Over many years of economic research, the author viewed the unsolved problems of the socialist societies much as one sees flaws in the space shuttle program, or the latest plane—these represent the present limits of humanity's achievements in their respective fields.

There is much to learn from the facts and processes discussed in this book, and in turn, these will prompt additional questions and further study.

THE COMMUNIST TRIALS AND THE AMERICAN TRADITION

- Expert Testimony on Force and Violence, and Democracy.

by John Somerville, Ph.D.

0723-1 269 pp. Index. Appendix.

A new supplemented edition. If the role of the Court in restricting voting rights in 2000 bothers you a bit, be sure to get a copy of this book, centered on the Court and 1st Amendment rights. When first published in 1956, author John Somerville was at the midpoint of his long life as a scholar-activist and noted educator. He had participated widely at universities and philosophical congresses in discussions about Marxist theory and its interpretations.

This book remains a comprehensive presentation of the basic doctrines of Marxism in their relation to democracy and to revolutionary "force and violence." Here Dr. Somerville discusses evidence from American history that the judges would not permit in the three Smith Act trials in which he was a witness for the defense.

Includes correspondence with Howard W. Smith, author of the Smith Act, and an Appendix of Somerville's essay on later Smith Act issues and decisions.

ALWAYS BRING A CROWD

- The Story of Frank Lumpkin, Steelworker

by Beatrice Lumpkin.

0725-8 \$12.95. 67 photos, 284 pp.

When Wisconsin Steel closed without paying the workers in Chicago, Frank Lumpkin organized the Save Our Jobs Committee. They fought 17 years and won settlements of \$19 million. Son of Georgia cotton sharecroppers, Lumpkin became a professional boxer, orange picker, construction worker, merchant seaman, steelworker and leader of the Communist Party USA.

"Bring a Crowd! Yes. It is masses of people in action who make the turning points in history. And *Always Bring A Crowd* is a family saga... All of the Lumpkins appear throughout the book and author Bea Lumpkin, Frank's wife, paints their portraits as deftly as any novelist.

"Every union member and unorganized worker, every parent or student who hopes to find a way to build a better society for all, should read this book." *John Woodford, journalist, Ann Arbor, MI*

"*Always Bring a Crowd!* is a study in perseverance and courage by working people to achieve ultimate justice. It's also a good read and a reminder of what can be accomplished through worker solidarity." *Steeltabor (USWA AFL-CIO magazine)*

"I recommend the book for college classes in labor studies, African American history, American history, sociology and family history."

Betty Balanoff, Professor Emeritus, Labor History, Roosevelt University, Chicago

BROTHER BILL MCKIE

- Building the Union at Ford

by Phillip Bonosky. 0727-4 196 pp. \$8.50

The labor movement is once again in daily battles to organize, to defend gains won, and help advance the well-being of our people.

Here is a drama from labor's past. A vivid account, told mainly through the experiences of Bill McKie, Ford worker and rank and file leader.

Bonosky makes the reader an "insider" of the long, tough work to unify and organize Ford workers, who faced Ford guns, thugs, blacklists, spies and speed-up on the job.

If you have ever been for the underdog, you will be inspired by Brother Bill McKie and the fight to win the union at Ford.

The author was not long out of the shop himself when he first wrote this book, and he pours into it the drama and emotion of a fine novel, while providing many insights for today's struggles.
